

## Press Release

### **Numetrics' CEO Ronald E. Collett Selected as the Keynote Speaker at IP 07 Conference in Grenoble France**

CUPERTINO, Calif., September 26, 2007: Numetrics Management Systems, Inc. the leading provider of IC project planning software, schedule risk assessment tools, and industry databases for benchmarking chip development capability, announced that President & CEO Ronald E. Collett will be featured as the Keynote Speaker at the upcoming IP 07 Conference in Grenoble, France. The title of Mr. Collett's talk will be "**Achieving Maximum Reuse Leverage: Lessons from Benchmarking 1,000+ IC Projects.**" <http://www.us.design-reuse.com/ip07/>

Mr. Collett's presentation will take at the IP 07 Conference in Grenoble, France on December 5-6, 2007.

#### **About Numetrics**

Numetrics Management Systems, Inc. is providing software for integrated circuit (IC) project risk management and industry benchmarking. In use by leading semiconductor firms, the software leverages Numetrics' patented IC design complexity calculation engine and proprietary mathematical models, which are calibrated with statistical data extracted from over 1,200 benchmarked chip projects from more than 30 major semiconductor companies. By leveraging its Industry Database, the Numetrics solution enables superior project schedule estimation and risk analysis, resource planning and benchmarking against industry norms.
